## **Compliance with EBA/GL/2014/10 regarding other systemically important institutions**

SIFIs in Denmark are designated with legal basis in § 308 in the Danish Financial Business Act.

Furthermore, the European Banking Authority, EBA, has issued a guideline [EBA/GL/2014/10](#) on the identification of 'other systemically important institutions'. By designating SIFIs according to § 308 in the Danish Financial Business Act, Denmark complies with the guideline.

According to the guideline, an institution with an automatic score of 350 basis points or higher, should be identified as SIFI. The guideline provides the possibility of using further optional indicators taking national conditions into account. The following three optional indicators are used in Denmark for the designation of SIFIs:

- The institution's balance amounts to more than 6.5 per cent of the GDP of Denmark
- The institution's loans in Denmark amounts to more than 5 per cent of the Danish credit institutions' total loans in Denmark
- The institution's deposits in Denmark amounts to more than 5 per cent of the Danish credit institutions' total deposits in Denmark

The result is that the following institutions are designated as SIFIs:
