

# IT solution for reporting MiFIR Transactions

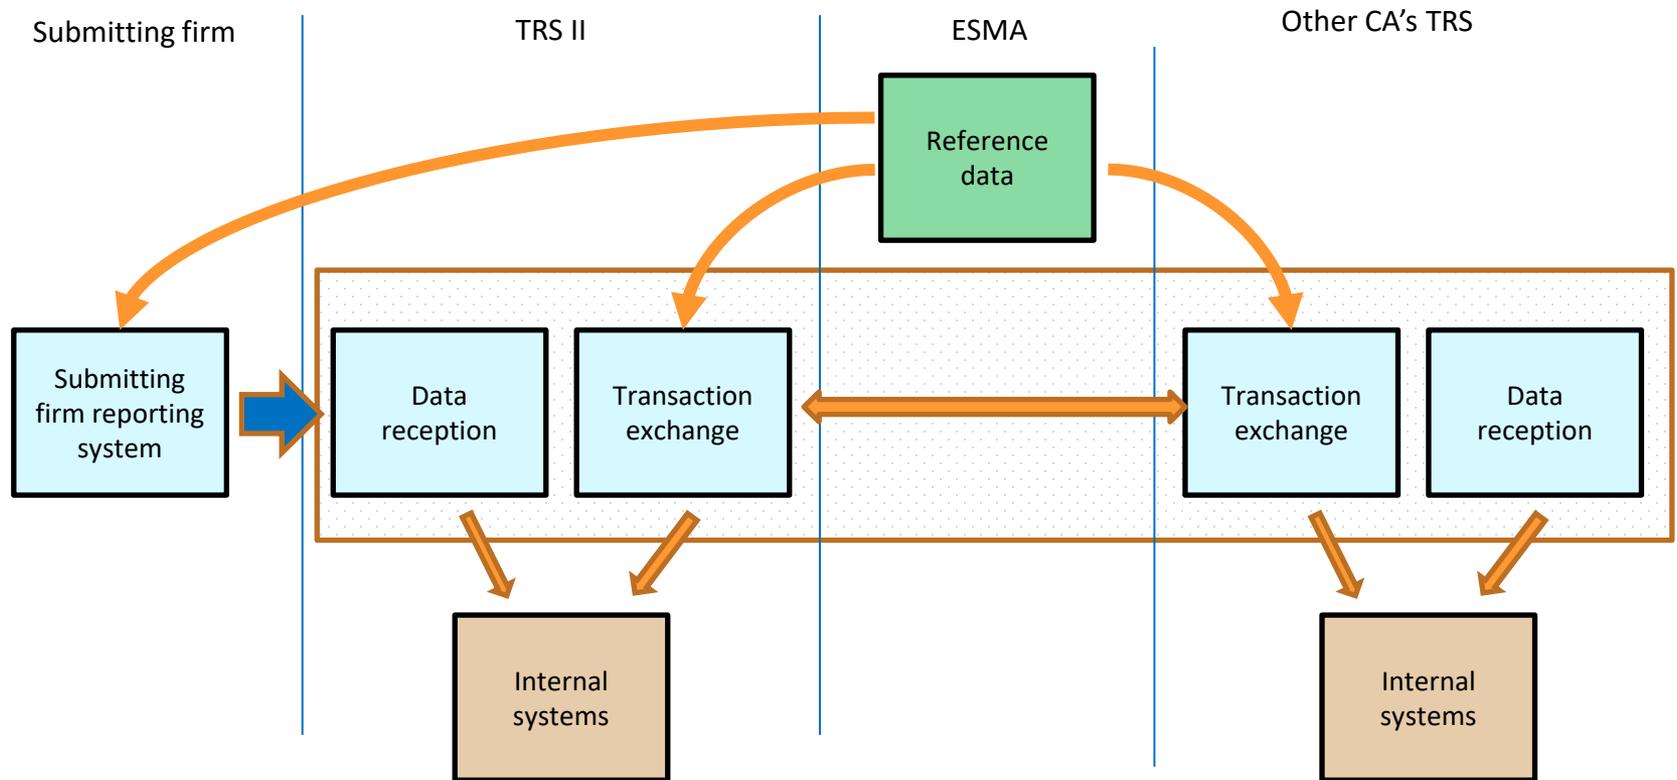

10-05-2017 - Finanstilsynet

# Agenda

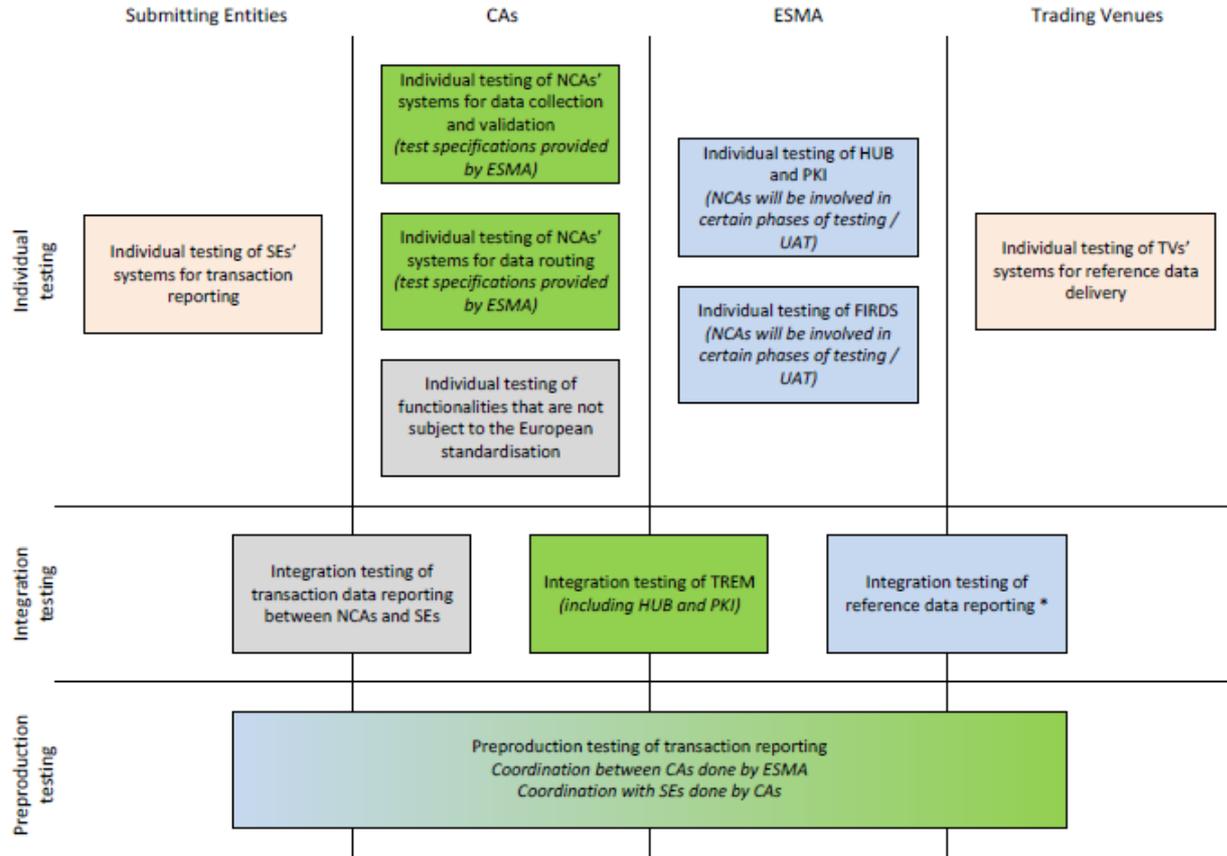

---

1. Test
    - Test overview
    - Test time schedule
    - Registration for test
    - Test cases
    - Known defects
  2. FTP-server
    - Security set-up and information
  3. Recap and recommendations
  4. Information and communication
  5. AOB
-

# 1. System overview

# 1. ESMA - Test overview

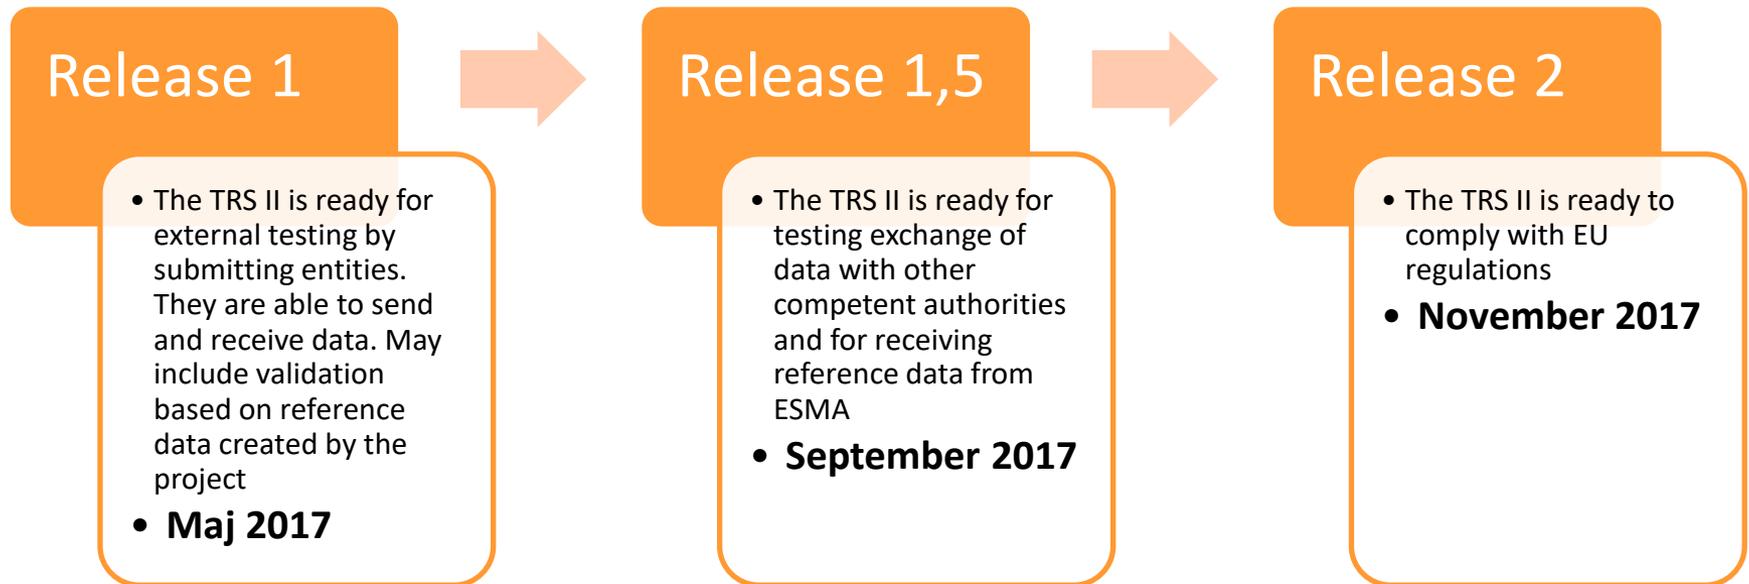

\* In the case of CAs who have not delegated data reference data collection, they will also need to perform integration testing with their TVs

Legend
Covered in transaction reporting project
Covered in related projects delivered by ESMA
Covered in projects delivered by NCAs
Covered in projects delivered by reporting institutions

# 1. TRS II Expected release plan

---

# 1. Test Expected Time Schedule

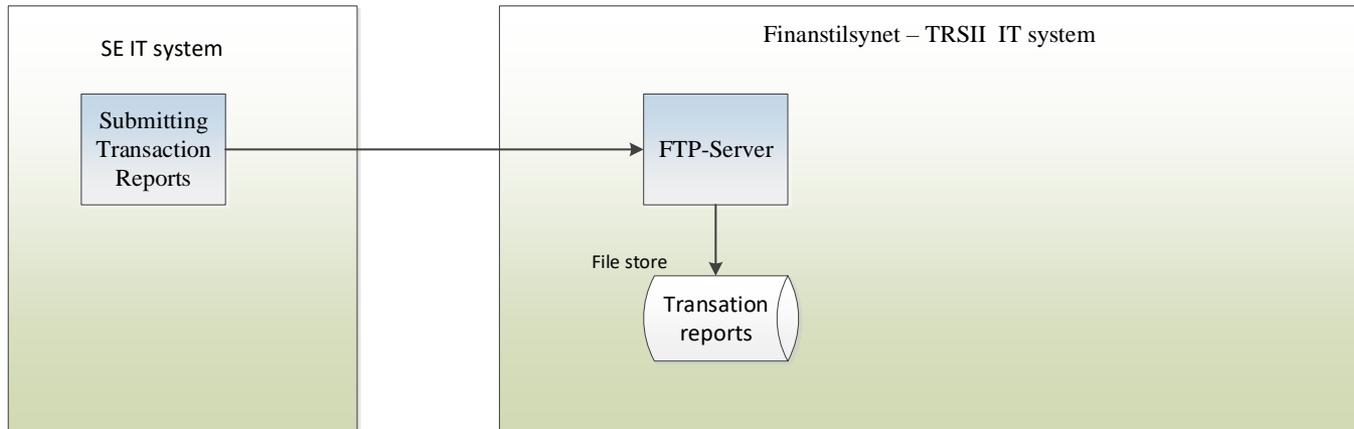

---

Release	Start date	End date	Test
1	May 2017	Sep. 2017	Part 1: Test of connection FTP-server Part 2: Test of validation of transaktion reports
1.5	Sep. 2017	Nov. 2017	Test with reference data from ESMA (if available)
2	Nov. 2017	Dec. 2017	A: Test of production release B: Pre-production with production data
	03-01-2018	-	Go-live, Production

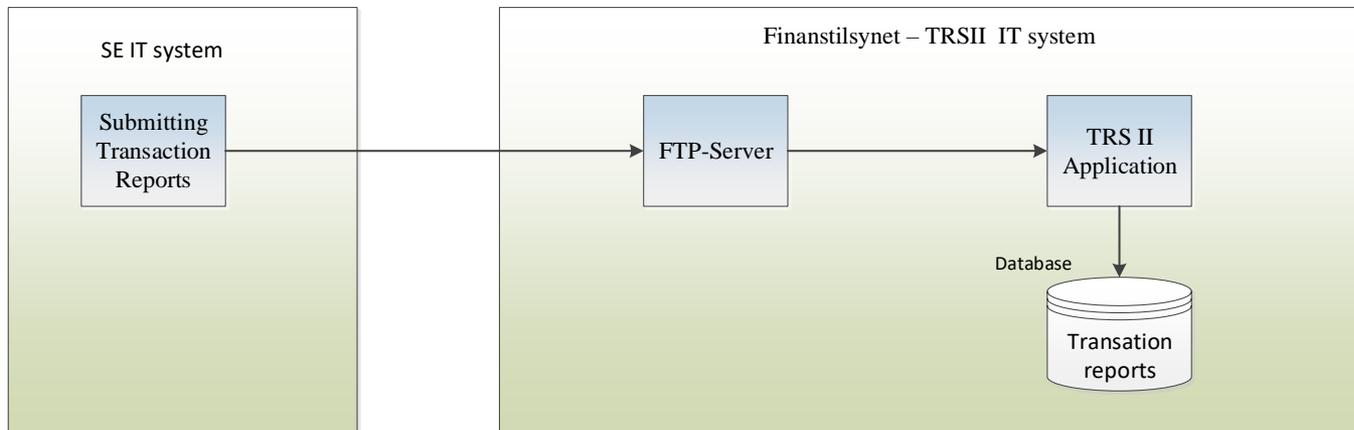

---

# 1. Test - Release 1

## Test Part 1 – Connetion to FTP-server

## Test Part 2 – Validation af transaktion reports

## 1. Reference data for Release 1 test

---

- In Release 1 we do not have connection to ESMA's FIRDS system and we will therefore strive to include the most common Danish instruments, LEI, MIC etc.
  - ESMA's plan is to go live with FIRDS July 2017
  - Once FIRDS is up and running at ESMA with good data quality then TRSII will use the reference data supplied by FIRDS.
-

# 1. Test plan - Release 1

---

Start date	End date	Test
29-05-2017	01-09-2017	Part 1: Test of connection to FTP-server
15-06-2017	01-09-2017	Part 2: Test of validation of transaktion reports
01-07-2017	07-08-2017	Summer vacation – no support from Finanstilsynet or BEC
September		Send test report for release 1 to all

---

# 1. Registration for test and production

---

Registration for test is done by:

1. Read instruction
2. Fill in the registration form
3. Send registration form to Finanstilsynet by email
4. Send SSH key pairs to BEC via email

## 1. Test Cases

---

We have prepared test cases that we will ask you to perform

1. Test cases for Release 1 is made and ready
  2. Test cases for Release 1.5 and 2 will be published later
-

## 1. Known defects

---

- Feedback file doesn't adhere to xsd. Two problems:
  - A simple one that will be fixed asap.
  - A more complex one: the name of the files are too long to fit into the 35 character limitation by ESMA. Eg.

`<BizMsgIdr>FF_TR_353800XVAQXELVCPC871_01_20170407_0092_01</BizMsgIdr>`

47 character long.

Will be shortened.

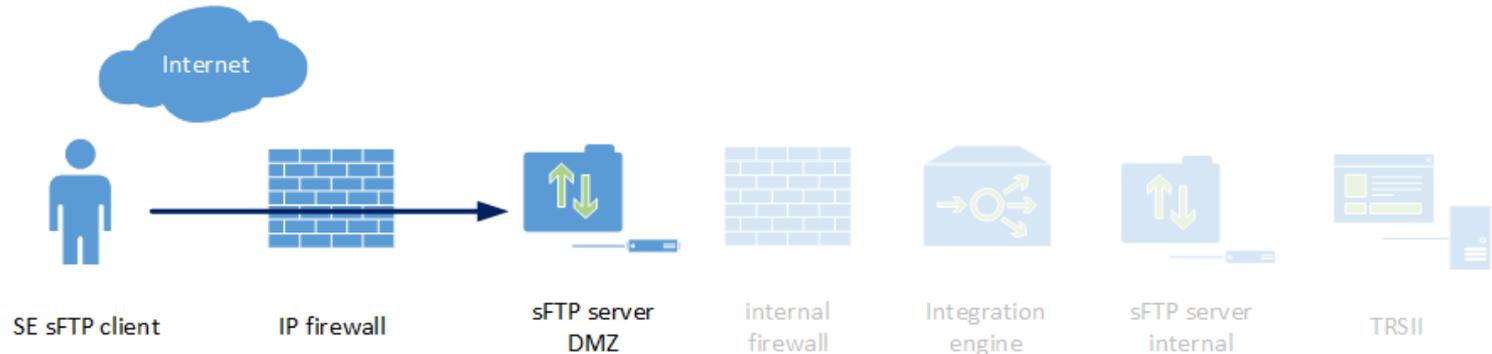

Not sure how - maybe remove LEI code.

eg. `<BizMsgIdr>FF_01_20170407_0092_01</BizMsgIdr>`

- Transaction identification in feedback file only uses Transaction reference number. It should be a concatenation of Executing Entity LEI and the Transaction reference number.
-

## 2. FTP setup - overview

---

- Upload to / download from TRSII via sFTP
    - Access via Internet; but servers not publicly available
      - Source IP needed for firewall opening
    - Server supports sftp and scp
      - SSH File Transfer Protocol / Secure File Transfer Protocol
      - Secure Copy Protocol
    - Both protocols uses SSH (Secure Shell) to provide encrypted safe transfer of files.
    - Uses symmetric encryption, asymmetric encryption and hashes to secure transfer
-

### 3. Recap

- 
- Keep reporting despite of missing feedback files.
  - SE must ensure that all feedback files are analysed and all reports are corrected
  - We urge you not to send production data to the test environment due to security levels
    - Security levels are not the same as production
    - Transactions could be exchanged with other countries
  - It is required that the same reference number is re-used for the changes and updates to the same trade.
  - Two test environments will be available. One which will resemble the production environment and one that will have the latest release due to be implemented in production.
-

### 3. Recap

- 
- You must delete feedback files from the ftp-folder: Incoming, after you have downloaded and read them.
  - All Transaction files must be ZIP'ed.
-

### 3. Recommendation

---

Considerations concerning size, timing and frequency of reporting:

- Reference data is published in the morning.
  - TR from day T cannot be validated until T+1 after reference data is processed
  - Avoid sending too many files (>10) pr day
  - One TR per submitted file is no-go unless that is the daily production
  - Avoid sending very big files (>10MB unzipped)
-

### 3. Recommendation

- 
- A Submitting Entity can include TR from different Executing Entities in one file. So number of files can be limited for ARMs.
  - It is recommended not to send a new file before feedback from a previous file has been received. This will ease the bookkeeping and avoid double reporting and cancellation. Exception is if TRS is down and SE are obliged to keep reporting.
  - The files are limited not to exceed 500.000 transactions.
-

## 4. Communications and information from Finanstilsynet

---

- We continuously update our website and we would ask you to get updated information here  
(<http://www.finanstilsynet.dk/da/Lovgivning/Information-om-udvalgte-tilsynsomraader/MiFIR-TRS>)
  
  - Direct questions to [MiFIR-TRS@ftnet.dk](mailto:MiFIR-TRS@ftnet.dk)
  
  - Mailing list – ensure you are on the mailing list – preferably using a shared mail.
    - Send any changes to [MiFIR-TRS@ftnet.dk](mailto:MiFIR-TRS@ftnet.dk)
-

## 4. Communications and information from Finanstilsynet

---

Information about the TRSII will be published on our webpage or send to your email

- Known defects and when they are solved
  - Service window
  - New test cases
  - Information about reference data
  - Upgrades of the IT-system TRSII
  - Next test periode
  - Questions and Answers
-

## 4. Information from ESMA

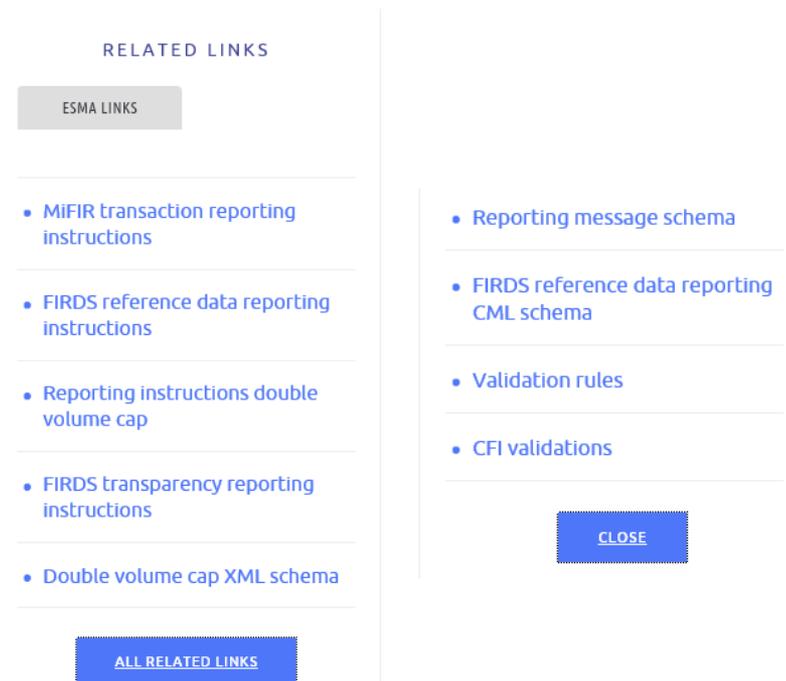

---

➤ ESMA:

*Expand links below to get*

*eg. Reporting message schema*

RELATED LINKS

ESMA LINKS

- MiFIR transaction reporting instructions
- FIRDS reference data reporting instructions
- Reporting instructions double volume cap
- FIRDS transparency reporting instructions
- Double volume cap XML schema

ALL RELATED LINKS

- Reporting message schema
- FIRDS reference data reporting CML schema
- Validation rules
- CFI validations

CLOSE

The screenshot shows a 'RELATED LINKS' section with a sub-section 'ESMA LINKS'. It lists five links: 'MiFIR transaction reporting instructions', 'FIRDS reference data reporting instructions', 'Reporting instructions double volume cap', 'FIRDS transparency reporting instructions', and 'Double volume cap XML schema'. Below this is a blue button labeled 'ALL RELATED LINKS'. To the right, a separate list contains four items: 'Reporting message schema', 'FIRDS reference data reporting CML schema', 'Validation rules', and 'CFI validations'. At the bottom right of this list is a blue button labeled 'CLOSE'.

## 5. AOB

---
